

CHRIS BUJOK

Wrocław, Poland | hello@chrisbujok.pl | +48 669 204 935

Full Stack Developer and open source contributor, previously led a team of 8 at an AdTech and MarTech development company. Always curious about how things work. Specializes mostly in Node.js, React, React Native and GraphQL.

EXPERIENCE

Newcross Healthcare Solutions Ltd.

London, UK (remote)

November 2016 - Present

Senior Software Engineer

As a full stack developer I put my effort into building service-oriented backend application and participating in development of React Native mobile app. I was responsible for preparing brand new React Native and Node.js apps, but besides that, I introduced GraphQL API to our stack. While working on the project, I started to be interested in improving open source tools that we use, so I've submitted pull requests to Jest and Feathers repositories.

Clearcode

Wrocław, Poland

October 2014 - November 2016

Tech Lead / Full Stack Developer

I was working on add network app based on PHP/Symfony stack with Angular as a frontend framework. I have successfully extended our technology stack with Node.js, which is now used in most system services and new apps. Created Slack bots that help in managing and developing the project. Since becoming a tech lead, I was responsible for architecting new solutions and improving existing infrastructure. I've set up data warehouse with Amazon Redshift and Elasticsearch. Refactored one of key microservices and implemented Interval Tree data structure with websockets endpoint, thus improved it's performance by 3000%. Introduced Docker for production environments (AWS).

Neverbland

Wrocław, Poland / London, UK

March 2014 - September 2014

PHP/Symfony Developer

Built couvertureandthegarbstore.com and implemented features like shopping cart, advanced categories module and product linking. Implemented Elasticsearch for searching store items.

Clearcode

Wrocław, Poland

October 2012 - February 2014

PHP/Symfony Developer

Developing Wordpress site for piwik.org and optimising it's performance and security. Working on Symfony and MySQL based ad management app integrated with AppNexus.

PROJECTS

Safari Force New Tab

github.com/chrisbujok/safari-force-new-tab

Safari Extension for Force Touch trackpads (new Macbooks and Magic Trackpads). It allows opening links in new tab by force-clicking them.

Spotivoting

github.com/chrisbujok/spotivoting

Application for voting Spotify tracks in the queue. Features searching tracks by artist and title, up/down voting and playing the queue. Implemented in React and Redux, uses Webpack and Babel for compiling and bundling.

EDUCATION

Vocational Technical High School in Ostrzeszów

2008 - 2012

Computer Science

SKILLS

Node.js, Express.js, Koa.js, Socket.io, GraphQL

React, React Native, Redux, AngularJS, Webpack,
Gulp.js, Grunt

MySQL, PostgreSQL, Elasticsearch, Redis

RabbitMQ, Linux, Git, AWS, Shell scripting
